
Using Smart Cards for Secure Physical Access

Smart Card Alliance Report
Publication Date: July 2003

Table of Contents

| | |
|---|-----------|
| About the Smart Card Alliance | 2 |
| Table of Contents..... | 3 |
| Executive Summary..... | 5 |
| Introduction | 7 |
| Physical Access Control System Overview | 10 |
| <i>Access Control System Components.....</i> | 10 |
| <i>Access Control Process</i> | 11 |
| The ID Credential | 12 |
| The Door Reader | 12 |
| The Control Panel | 13 |
| The Access Control Server | 14 |
| <i>Access Control System Data Formats</i> | 14 |
| <i>Operational Range</i> | 14 |
| <i>Security Considerations.....</i> | 15 |
| Card Security | 15 |
| Data Protection | 15 |
| Card and Data Authentication | 16 |
| Card–Card Reader Communications..... | 16 |
| Card Reader–Control Panel Communications..... | 17 |
| <i>Implications of Recent Trends in System Architecture.....</i> | 18 |
| The Smart ID Card: The Role of Smart Cards in Secure Physical Access Systems | 19 |
| Key Considerations for Secure Physical Access ID System Implementation..... | 21 |
| <i>Candidate Smart Card Technologies</i> | 21 |
| Contactless Smart Card Technology | 21 |
| Contact Smart Card Technologies..... | 23 |
| <i>User Interface Requirements and Issues</i> | 23 |
| Ease of Use vs. Performance and Security | 23 |
| Impact of the Americans with Disabilities Act | 24 |
| <i>System-Level Considerations.....</i> | 24 |
| Centralized vs. Distributed Systems | 24 |
| Open vs. Proprietary Systems | 24 |
| Interoperability | 25 |
| <i>Life-Cycle Management.....</i> | 26 |
| Single Application Access Cards | 27 |
| Multiple Application Cards | 27 |

| | |
|---|-----------|
| <i>Costs and Benefits</i> | 28 |
| <i>Market Trends</i> | 29 |
| Government | 29 |
| Commercial | 30 |
| Emerging Technologies | 30 |
| Migration to a Smart Card-Based Physical Access ID System | 32 |
| <i>Key Migration Considerations</i> | 32 |
| Multi-Technology Cards | 32 |
| Multi-Application Cards | 34 |
| Multi-Technology Readers | 34 |
| Access Control System Cabling | 34 |
| Access Control Data Formats | 35 |
| New Applications Enabled by Smart Card Systems | 36 |
| <i>Logical Access Control Applications</i> | 36 |
| PIN/Password Protection | 36 |
| PKI Support | 37 |
| Symmetric Key Support (One-Time Passwords) | 37 |
| Biometric Support | 38 |
| <i>Payment Support</i> | 39 |
| <i>Secure Data Storage</i> | 40 |
| Conclusion | 41 |
| References and Resources | 42 |
| Publication Acknowledgements | 43 |
| Appendix A: Profiles of Smart Card-Based Secure Physical Access System Implementations | 44 |
| <i>Sun Microsystems JavaBadge</i> | 44 |
| <i>U.S. Department of State Access Control Smart Card Implementation Project</i> | 45 |
| <i>Department of Homeland Security Identification and Credentialing Card</i> | 46 |
| <i>Transportation Security Administration Transportation Workers Identification Credential (TWIC)</i> | 47 |
| <i>NASA Smart Card Project</i> | 48 |
| <i>American Express Physical Access Control for New York Headquarters</i> | 48 |
| <i>Microsoft</i> | 49 |
| Appendix B: Definition of Terms & Acronyms | 50 |
